Wouter Postma
Senior Vice President, Cloud Platforms

Wouter is responsible for ActiveVideo's cloud strategy and architecture. Throughout his 15-year career in the media and entertainment, he has created a strong track record running devops, operations and engineering organizations delivering high performing, scalable cloud environments.

Wouter leads the teams who are developing, implementing and operating ActiveVideo's cloud platforms globally. He is also heading up the technical teams who integrate, certify, and support the company's cloud-based solutions - such as CloudTV and AppCloud - for customers around the world.

Prior to joining ActiveVideo, Wouter was Vice President of Platforms and Architecture Talpa Network, and prior to that Vice President of Digital Technology. During his time at Talpa, Wouter was running digital products in over 35 countries, and brings knowledge and hands-on experience of commercializing and scaling solutions globally.
